

# FIDELITY MONITOR & INSIGHT

## Corrections:

### ***May 2019 — Fidelity Monitor & Insight***

1. On page 1 of “Message from Jack,” the Financial Crisis occurred in 2008, not 2018 as written.
2. The relative volatility for **Conservative Income Muni** is not zero as shown in the **Scorecard** and referred to on page 4 (third column). It is actually 0.04.

### ***October 2018 — Fidelity Monitor & Insight***

The Asset Allocation percentages for the **Income Model** in the October issue were incorrect.

The corrected figures are:

Stocks: 24.2% Bonds: 46.4% Cash: 4.9% Alternatives\*: 24.5% Yield: 2.5%
