Year-End Review

When push came to shove, there were only three asset classes in 2008: cash, treasury bonds, and everything else. As the sub-prime crisis evolved into a massive global credit crunch, stock values were cut in half, conservative strategies lost a third, and even corporate bonds suffered double-digit losses.

YEAR-END REVIEW - Continued on page 2

2008 GROWTH FUND PERFORMANCE

Changes For G&I, VIP G&I, Select System, and VIP Sector

On Monday, 1/12, we'll make several changes:

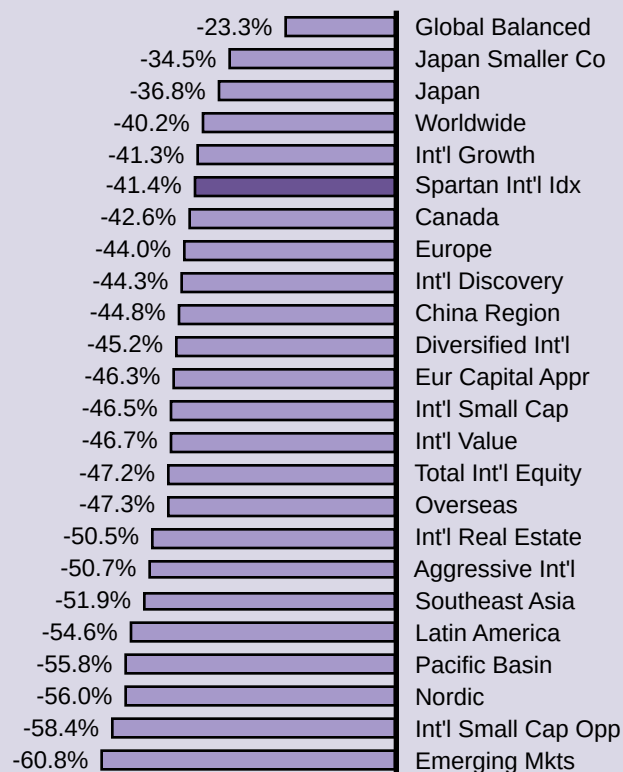

Our Growth and Income Model will sell **Asset Mgr. 20%** (328/FASIX) and **Fidelity** (3/FFIDX), buying **Puritan** (4/FPURX), for a mix of 46% **Puritan**, 37% **Balanced**, and 17% **Disc. Equity**. This move will reduce cash and boost bond exposure.

Our VIP Growth & Income Model will exchange **VIP FundsManager 20** for **VIP Inv Grade Bond**.

Our Select System will exchange all of **Medical Equip.** (354/FSMEX) and one-sixth of **Consumer Staples** (9/FDFAX) for **Construction & Housing** (511/FSHOX). The resulting mix will be roughly 19% **Construction & Housing**, 18% **Biotech**, 17% **Consumer Staples**, 19% **Transportation**, 13% **Utilities Growth**, and 14% **Chemicals**.

Our VIP Sector Model will sell one-half of **VIP Health Care** and one-sixth of **VIP Consumer Staples**, and buy **VIP Consumer Discretionary**.

2008 INTERNATIONAL PERFORMANCE

The string of events looked somewhat like a repeat of the Asian currency crisis of 1998, except the epicenter was here in the U.S. and the resulting credit crunch was far more extreme. Excess financial leverage, courtesy of the hedge fund industry and other institutional investors, triggered a broad financial bust that in the last century has been eclipsed only by the Great Depression.

Managing the nearly instantaneous transition from commodity-driven pricing pressures to deflation was especially difficult. With many industrial firms cut off from their lines of credit, global demand for oil has dropped almost 10% overnight, throwing fuel markets into a chronic surplus situation. It's certainly possible we'll see another energy crunch sometime in the distant future, but probably not for

at least five years. Many of the largest industrial energy users are becoming casualties of the financial crisis, meaning market share will move to producers that have greater efficiency. That suggests energy demand could remain subdued even after a global recovery cycle kicks in.

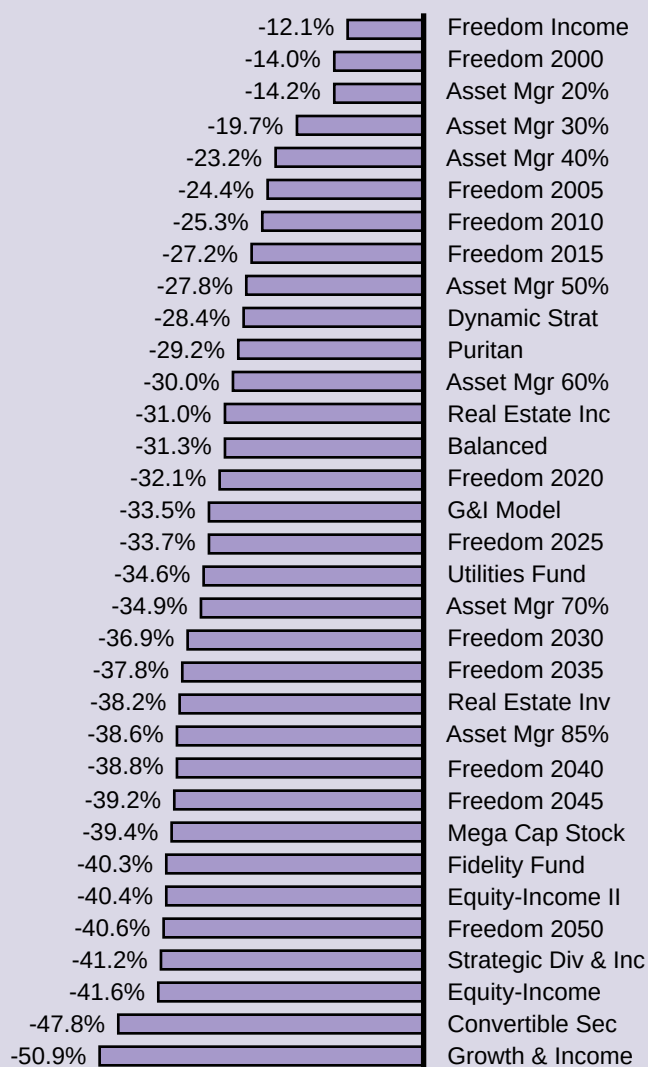

Most of Fidelity's stock funds fell harder than the S&P 500. It's not unusual for actively managed funds to lag in a bear market, but this time around the effect was magnified by mutual fund redemption activity. With the bargains that have been created, it should be relatively easy for actively managed funds to outperform over the next 3-5 years, but all bets are off until redemptions subside – which might not occur until 2010.

DOMESTIC GROWTH FUNDS

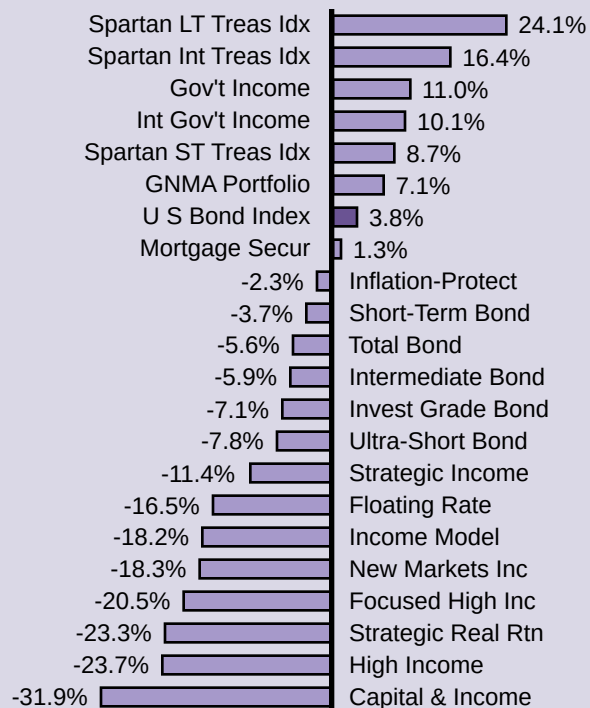

Small Cap Value finished with a significantly smaller loss than the S&P 500. Stockpicker Chuck Myers scooped up bargains in small bank stocks after many were hit despite healthy balance sheets and an influx of new customers defecting from larger banks.

Fidelity's quantitative stockpicking models seem to be coming of age, as evidenced by **Focused Stock**. Manager Stephen DuFour cut his heavy energy position in half just before the big plunge, and soon after doubled his financial weighting by picking up healthy players on the cheap. The fund's small size was key – it would be difficult to execute a strategy requiring 400% turnover in a larger fund.

2008 G & I, REAL ESTATE, & ASSET ALLOCATION PERFORMANCE

2008 BOND FUND PERFORMANCE

Contrafund and **Low-Priced Stock** held up better than most other domestic stock funds, thanks to defensive positioning, above-average cash holdings, and a modest redemption activity for their size.

After a stellar seven-year run, the fun ended for **Leveraged Company Stock**, which suffered the largest loss in the group. Over half of its holdings were in energy and materials just before commodity stocks took an unprecedented fall. On top of that, many of its non-commodity holdings lagged because debt-heavy firms were cut off from credit.

Our Growth Model lagged the S&P 500. We bet heavily on large-cap growth funds in hopes that a portfolio underweighted in financial stocks would outperform, but technology stocks suffered more than the market when the downturn hit.

Our Unique Opportunities Model was an even bigger disappointment. Our energy-heavy holdings (**Independence** and **Leveraged Company**) were hit hard, and we did a poor job of fund selection in the remaining positions. We also failed to make any defensive moves until after the damage was done.

INTERNATIONAL FUNDS

Foreign stock funds were hit slightly harder than domestic stock funds, mainly because of the dollar's rebound.

Global Balanced, one of our favorites, held up well thanks to the bond side of its portfolio. Ironically, it outperformed **Balanced**, because foreign bonds did better than domestic bonds.

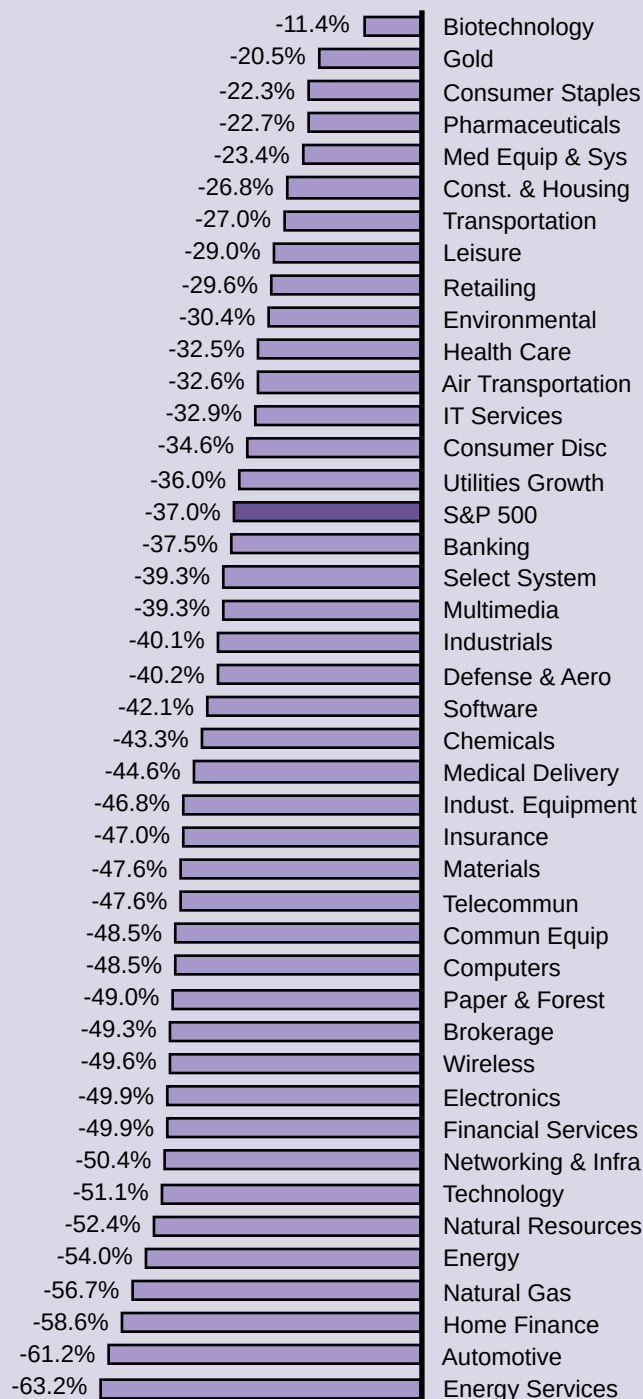

Despite another round of deflationary pressures and a tough environment for auto stocks, **Japan** and

Japan Smaller Companies kept losses smaller than other foreign stock funds.

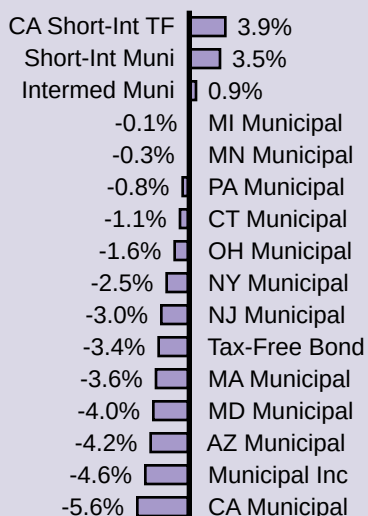

Canada, a choice we favored for most of the year, managed an above-average finish despite significant

2008 SELECT FUND PERFORMANCE

2008 MUNI BOND PERFORMANCE

GUIDE TO FIGURES LISTED ON PAGES 4 AND 5

Gain/loss percentages are for prior month's close (annualized for periods over a year). Reinvested distributions are assumed. Size figures are for the close of the prior month, in millions. Risk is based on standard deviation of daily gains and losses over a one-year period, relative to the S&P 500. Fee: **0.75(90)** indicates a 0.75% redemption fee on shares held less than 90 days. All retail Fidelity funds are no-load. If a fund is closed to new investors, it is listed as such in the Fee column. Fidelity limits roundtrip trades to two in the last 90 days and four in the last 12 months (a roundtrip trade is defined as the purchase and sale of a fund within 30 days). Fund ratings: **B******* is for a **favorite buy**, **B****** means **buy**, **H***** means **hold** for the long run, **S**** means reduce to below 5% of holdings, **S*** means **sell** and move to a buy-rated fund within the same asset class. Upgrades and downgrades from the prior month are indicated by ↑ and ↓.

VIP CORNER

Fidelity's Variable Insurance Products allow tax-deferred growth, but the benefit may be offset by higher tax rates at withdrawal. Performance figures reflect the Retirement Reserves fee structure. Returns for the Personal Retirement Annuity are roughly 0.5 percentage points higher per year.

2008 YTD: - 47.6%

Our Unique Opportunities Model gained 2.8% in December.

exposure to the commodities bust.

Most emerging market funds suffered heavy losses. But Fidelity did reasonably well with **China Region**, which invested in Hong Kong and Taiwan.

G&I AND ASSET ALLOCATION FUNDS

Freedom Income, **Freedom 2000**, and **Asset Manager 20%** lagged with double digit losses, despite keeping more than 75% in cash and bonds. But these funds held up better than others that had more exposure to stocks.

Balanced and **Puritan** lost almost a third of their value. Their stock holdings declined more than the S&P 500, much like the growth funds. And their bond holdings, which accounted for about 35% of holdings prior to the market's plunge, did not do a very good job of cushioning the blow. Despite the disappointment, we think these funds have good recovery potential, especially on the bond side.

Two funds lost roughly half their value. Heavy energy exposure and hedge fund selling pressures weighed on **Convertible Securities**, while an early bet on "cheap" financial stocks was the undoing for **Growth & Income**.

Our Growth & Income Model, which picked among this grouping of funds, suffered an unusually large loss for its risk level. We would have done slightly better if we had not sought to outperform with **Convertible Securities** and **Consumer Staples**, but losses for the year would still have been large.

BOND FUNDS

An unprecedented flight-to-safety in the bond markets pushed up treasury valuations and triggered a price plunge in most other groups.

Fidelity's long-term and intermediate treasury index funds finished with unusually strong gains, thanks to minimal credit risk and declining long-term interest rates (think twice before jumping on this trend, because the best bond opportunities are in higher-yielding securities that have yet to recover).

Investment grade and high yield funds suffered losses well in excess of their income streams. Funds that invest in junk bonds were hit especially hard, with most suffering losses that would be large for stock funds in any other year.

A lack of well-capitalized insurers of municipal bonds pulled down the value of long-dated munis, causing most funds in this group to finish with losses. With state budget pressures mounting, municipal bonds are now behaving much like corporate debt.

Our Income Model lost much more than we expected. We paid a price for our heavy reliance on asset allocation funds. Returning to bond funds helped a little in December, and we see many good bond fund opportunities going into 2009.

SELECT PORTFOLIOS

The energy group was out in front for the first half of the year, but the commodities bust pushed these funds all the way to the bottom for the year. That left an interesting collection of health care and consumer groups holding the top spots for 2008.

Biotechnology held up significantly better than the rest of the pack. Investors are realizing that bio-engineered drugs are not easy to copy at the end of their patent life, potentially giving these firms a better-than-expected return on their research dollars.

Several consumer groups finished in the upper third. The market is betting that survivors in this segment will benefit from increased market share and expanded economic stimulus programs.

Our Select System finished slightly behind the S&P 500, but ahead of the average Select. It was not a bad outcome considering how much energy exposure we had when the commodities bust hit, but the magnitude of the loss was disappointing. ■

Happenings

Contrafund and **Low-Priced Stock** have been reopened. Both funds are relatively defensive and are holding above-average levels of cash.

Jed Weiss has been named manager of **Int'l Small Cap Opportunities**. He'll continue to manage **Int'l Growth** and co-manage **Total Int'l Equity**. ■

DECEMBER DISTRIBUTIONS

December distributions are listed on pages 4 & 5. Fourteen funds had two December payouts: **Aggressive Growth** (.026/11.38 on 12/12 and .002/11.41 on 12/30), **Canada** (.128/31.10 on 12/5 and .015/34.44 on 12/30), **Growth Co.** (.068/47.38 on 12/12 and .01/48.19 on 12/30), **Freedom Income** (.03/9.41 on 12/5 and .10/9.45 on 12/26), **Latin America** (.35/24.38 on 12/5 and .11/27.12 on 12/30), **Lev. Co.** (.091/13.73 on 12/12 and .01/13.98 on 12/30), **Real Estate Inc.** (.20/6.61 on 12/19 and .04/6.62 on 12/30), **Real Estate Inv.** (.24/15.09 on 12/19 and .02/14.87 on 12/30), **S.E. Asia** (.18/17.30 on 12/5 and .015/18.51 on 12/30), **Commun. Equip.** (.04/10.50 on 12/5 and .005/11.25 on 12/30), **Const. & Housing** (.21/23.72 on 12/12 and .04/23.40 on 12/30), **Environmental** (.06/12.30 on 12/5 and .01/13.14 on 12/30), **Materials** (.19/29.30 on 12/12 and .01/29.92 on 12/30), and **Technology** (.09/36.93 on 12/5 and .015/38.95 on 12/30). Funds scheduled for January include **Aggressive Growth**, **Conv. Securities**, **Equity-Income II**, **Growth Company**, **Independence**, **NASDAQ Comp. Idx**, **New Millennium**, **CT Muni**, **Muni Inc.**, **NJ Muni**, and **Strategic Div. & Inc.**
